

EX2

THE EXPEDITION DIVING SUIT

The EX2 has its origin in our military line of breathable drysuits made for the Special Forces where movability, breathability and low weight is essential. The EX2 delivers that to the MAX! This suit is a special tool made for a special purpose. It is made with maximum comfort in mind, erasing the line between what you do above and below the water. As with any special tool there are NO compromises, at least not when it comes to its main purpose.

If you need a traditional diving suit, a suit that can take anything you throw at it, buy one of our tough butyl based suits instead. The EX2 is slightly more fragile, slightly more sensitive and can't take quite as much wear and tear. If you can accept this, the suit will serve you well. The EX2 doesn't compromise on comfort and flexibility!

The suit is equipped with exchangeable silicone seals in both the neck and wrists as standard. These are possible to change at site, in any weather conditions, thanks to the new soft and flexible SI TECH rings. If you choose to use latex seal, they will fit just as well.

The EX2 uses fabric socks so you can choose your own footwear depending on your activity, rock boots, fins or Muck boots – it is up to you.

Thanks to the material composition and the silicone seals this suit will always be ready for action, even after long term storage.

MEN Blue Art. No. 50012

MEN Red Art. No. 50212

LADIES Red Art. No. 50222

LADIES Pink Art. No. 50722

EXPEDITION DIVING SUIT

SI TECH Soft Quick Neck Ring with preinstalled Silicone seal. Works also with latex or neoprene.

Flexibel YKK AquaSeal zipper ensures great movability.

Pee zipper

SI TECH Soft Wrist Flex Ring with preinstalled Silicone seal.

Photo: Martin Kraus

"I developed this suit for myself. It is a completely new kind of suit, designed with only one purpose in mind - to make me perform at my best as an underwater photographer. Its outstanding movability, breathability and flexibility creates a feeling of not wearing a dive suit at all. In fact, I put the suit on in the morning and take it off in the evening and the whole day I am ready to jump into the water to take the picture of my life. All the details on this suit derive from specific needs. Pockets for all my photo gadgets, a radio and microphone holder to keep in contact with wildlife spotters or guides and a pee zipper for speedy relief. The low weight and compact packing volume makes it easy to carry anywhere at any time"

- Göran Ehlme Underwater photographer and head of Waterproof R&D

DETAILS AND FEATURES

SOFT WRIST FLEX RING
SI TECH's new wrist ring quick connector for wrist seals. Can be used for both silicone and latex. You can change the seal in minutes without tools or gluing.

FLEXIBLE NECK RING
The QUICK NECK ring from SI TECH is a flexible ring for the neckseal. Follows the form of your shoulders. Works with Latex, Silicone and Neoprene seals.

ANATOMICAL SCULPTING
All critical parts concerning mobility, like arms, legs and torso have been anatomically designed to enhance the liberty of action.

DUAL LEG POCKETS
Slim profile leg pockets with D-Ring. 21x13cm.

FABRIC SOCKS
Same fabric as the suit. Use your own footwear depending on activity; rock boots, fins or Muck boots.

FLEXIBLE DRY ZIPPER
Light and flexible YKK AquaSeal.

ZIPPER PLACEMENT
The placement of the back zipper enhances movability and makes it possible for the diver to open and close.

DETACHABLE WARM CUFFS
The arms are equipped with warm cuffs that minimize heat loss at the wrists. Detachable if necessary.

PEE ZIPPER
Relief zipper YKK AquaSeal. (only on men's suit)

ARM POCKETS AND HOOK&LOOP PATCHES
Two different arm pockets for radio or gadgets and hook-and-loop patches for name or unit info.

SI TECH VALVES
Swiveling inlet valve and adjustable automatic outlet valve. Provided by SI TECH.

HIP VALVPORT
An extra valveport for battery cables or suit gas.

GADGET HOLDERS
Holders for microphone, radio, computer or other are placed on the chest and lower arms.

KEVLAR® REINFORCED KNEE PADS
Military Graded DuPont™ Kevlar® fiber reinforced Kneepads. With pocket for knee protection padding.

BREATHABLE SHELL
Extremely lightweight 4-LAYER AQUAMAX 330 Denier Cordura Nylon. A complete suit with valves weighs 2.3 kg. (Men's size Medium)

DuPont™ and Kevlar® are registered trademarks of E. I. du Pont de Nemours and Company
