SPORT SERIES

# SPORT SERIES

At times we are told that our suits are too warm and excessively well-built. We are willing to live with that kind of criticism. To address the fact that our standard suits are considered too warm under certain circumstances, we devised a clever solution. We recommend that you buy a thinner suit – preferably the W30 Sport Series from Waterproof. As a disclaimer we must confess that the W30, unfortunately, suffers from the same ailments as our standard collection, it looks smart and it is well constructed, the fit is excellent and it is probably too warm and comfortable as well. Unfortunately, we can't help but produce our suits this way.

# SIMPLICITY

The W30 Sport Series is designed with simplicity in mind. Removing anything unnecessary to make a line of products suitable for a variety of watersport activities. Yet, all our experience in pattern construction and knowledge about how a suit or glove should fit is built into these suits and accessories. We use the same high quality fabrics, adhesives, threads, bindings and zippers as in our top level suits.

# FULL RANGE

The W30 Sport Series is a full range, from Fullsuits to Shorties, from Hoods to Boots and Rashguards to Swimsuits. Everything designed to fit together. The entire range contains of 10 different products in 10 different sizes.
