DIVE LIGHT

DESCRIPTION

Bludive BD20(V2) features a single Luminus LED, delivering up to 1800 lumens at 6500K for excellent color rendition. The SMO reflector emits a concentrated beam at 5 degrees, producing a focused beam with a maximum distance of 641 m. Powered by a 18650 battery (up to 4 hours). With the robust water pressure-resistant construction, compact size, and functional user interface, the BD20(V2) is perfectly suited as a primary light for recreational, deep, and professional diving purposes.
